SUZUKI GSX-R1000/R (2017) 'LOWER BRACKET COVER' TRIM INSTRUCTIONS

When using the Brock's Performance Front End Lowering Kit (#930151) on the (2017) GSX-R1000 and GSX-R1000R, trimming the 'lower bracket cover' is required to obtain proper clearance for the Front End Lowering Strap.

Installation Notes:

- Remove two (2) bolts securing the lower bracket cover. Remove cover.
- Apply painters tape following the dotted cut lines shown in (Figure 1).
- Using a coping saw (or tool of your choice) carefully cut along the marked areas.
- Carefully smooth the cut edges, using a rotary tool drum sander, fine file or sandpaper.
- A modified lower bracket cover is shown in (Figure 2).
- Reinstall the modified lower bracket cover and check for proper clearance around the Front End Lowering Strap.
