FRONT SPROCKET KIT KAWASAKI Z900RS (2018) PRODUCT INFORMATION

This kit directly replaces the OEM front sprocket on Kawasaki Z900RS (2018) models. The smaller sprocket in this kit increases the torque applied to the rear wheel, which then allows for faster acceleration.

Package Contents:

Front Sprocket Kit shown:

1. One (1) Front Sprocket
2. Two (2) Shims
3. Product Information Page

If your package contents differ, please contact Brock's Performance at 937-912-0054.

For additional installation support please refer to the OEM service manual.

Installation Notes:

- Follow the OEM service manual for front sprocket removal and installation.
- When loosening or tightening the engine sprocket nut, apply the rear brake to prevent movement.
- Install one (1) shim on each side of the sprocket.
- The stamping on the sprocket faces outward.
- It is recommended to replace the bent tab washer and rear axle cotter pin (not included).
- Torque engine sprocket nut to 108 lb.-ft (147 N·m).
- Adjust drive chain as needed.

ALL BROCK'S PERFORMANCE PRODUCTS ARE DESIGNED FOR CLOSED-COURSE RACETRACK USE ONLY!
