## Installation Instructions for Kawasaki ZX-10R (11-16) PAIR Block-Off

The black cap (#832648) included with your ZX-10R (11-16) exhaust system purchase is used to block off emissions (PAIR) to help prevent 'deceleration pop' and also prevent ram-air pressure loss from the airbox after blocking the PAIR.

1. Lift and prop gas tank.
2. Remove PAIR hose from front left airbox nipple. *See Figure 1.*
3. Use a long, slender, and dull-ended object (e.g. Sharpie® marker or 3/8" drive extension) to prevent damage to the cap during installation. *See Figure 2.*
4. Push the cap past the bend, as shown. *See Figure 3.*
5. Reinstall hose onto the airbox nipple. *See Figure 4.*
