TIMING RETARD ELIMINATOR*- Part # TRE-008 (2006 & up ZX-14) *(patent pending)

Please read and understand all of these instructions before installing this product !!
(you may waste your time as well as our's by not reading them)

- 1) Locate GPS connector above front sprocket cover - under fuel rail (green 4 wire connector)
- 3) Separate connector and remove the 2 wires (green w/red stripe and black w/yellow stripe) from the female end of the connector (the end with the male pins)
You will need a sharp pointed implement to depress the latches that hold the pins into the connector. **Be gentle !!**
- 4) Install the pins that were removed from the stock connector into the supplied connector.
 - a) When installed correctly, you will hear a click when they seat.
 - b) Pay attention to their orientation as they will only fit when in the proper position.
(if you force them they will get damaged)
 - c) **Please install the black/yellow wire into supplied connector where black mark is, and install green/red wire on the opposite side.**
 - d) Reconnect Green connector.....
- 5) Attach ground terminal to one of the bolts on front sprocket cover.
- 6) Gear position display will show "N" when in neutral and "6" when in any gear

DO NOT CONNECT TO ANY OTHER CONNECTOR ON MOTORCYCLE !!!

We offer the PC3 with our custom map already installed for your convenience.
(when it becomes available)

- 7) Enjoy your improved driveability!!
And remember..... I designed this product for you, to make your ride more enjoyable.

Thank you for your purchase !!
Ivan
