## PLEASE READ: NINJA H2 and H2 SX OWNERS WITH BROCK FLASHED ECU

**Attention Ninja H2 and H2 SX Owners:** When the bike is equipped with Brock's Performance ECU flash, the peak RPM limiter on the H2 and H2 SX is increased by 1000 RPM, to match the peak RPM limit of the H2R. This increase is responsible for a large increase in power on these machines. Due to increased wear and heat, it is recommended that the maintenance intervals as outlined by the [Kawasaki Ninja H2R \(2015\) Service Manual](#) be followed in addition to standard H2 and H2 SX maintenance. The time-based H2R maintenance schedule can be found below.

In addition to following the time-based H2R maintenance schedule, follow the mileage-based H2R intervals for chain care and lubrication. The H2R Factory Service Manual suggests oiling your chain every 300 miles and replacing the chain every 2800 miles.

**Note:** This RPM threshold is set so the owner **can have access** to full power, if desired. This does not mean the owner is *obligated* to rev the bike this high, so the above recommendations would not apply.

Items	Q: Inspection	G: Change or Replacement	Service Time (h)		See Page
			15	30	
<b>Engine</b>					
Air cleaner element	Q		Q		2-73
Transmission				Q	2-74
Clutch	Q		Q		2-74
Supercharger chain and sprocket	Q		Q		2-75
Supercharger impeller axial play	Q		Q		2-69
Engine oil		G		G	2-40
Engine oil filter				G	2-41
Pistons and piston rings				G	2-75
Piston pins				G	2-75
Crankshaft				Q	2-75
Crankshaft bearings				G	2-75
Connecting rods				Q	2-76
				G: every 60 hours	2-76
Connecting rod bearings				G	2-76
Spark plugs				Q	2-67
Supercharger coupling dampers				Q	2-76
Camshaft chain				Q	2-76
Valve clearance	Q		Q		2-32
Valves, valve seats and valve springs (exhaust side)				Q	2-77
Exhaust Valves				G: every 60 hours	2-77
<b>Chassis</b>					
Drive chain	Q			G	2-77
Rear wheel coupling dampers	Q		Q		2-44
