KATANA (20-22), GSX-S1000 (17-20), and GSX-S750 (15-22) BrockSTAND™ PRODUCT INFORMATION

The Katana BrockSTAND™ is designed to easily provide users with a full range of adjustability from 'ultra-slammed' drag to street applications using only a 4mm hex key. Adjustment ranges: Road Version 0.00" to 2.00"

Attention: When altering the factory set length of the kickstand threadlocker must be reapplied to the Adjustment Bolt (3). Brock's Performance will not warrant parts lost as a failure to do so.

For additional installation support, please refer to the OEM service manual.

Installation Notes:

- Install using the OEM kill switch, springs, and mounting hardware. See page 2 for side-stand installation and removal instructions from the OEM Katana service manual.
- When adjusting the foot length, blue threadlocker (supplied) **must be applied** to the threads of the Adjustment Bolt (3) before installation. Torque bolt to 48 in-lb. (5 Nm).
- Red threadlocker is applied to the Spring Mounting Stud (4) and Safety Switch Plate Mounting Bolts (6) during factory assembly. The Spring Mounting Stud (4) and Safety Switch Plate Mounting Bolts (6) should not be removed. In the event removal is required, apply red threadlocker to the threads before installation.
- **Installation Tip**: To ease spring removal/installation, fold the kickstand down to fully extend the spring. Place a penny between each of the open spring coils. When the kickstand is folded up, the spring will remain extended and be easier to remove/install.
