OIL FILTER RELOCATOR INSTALLATION INSTRUCTIONS

The oil filter relocator allows for easy filter access for Sidewinder or large tube exhaust systems. Relocating the oil filter helps make it easier and quicker to change engine oil

Check Package Contents:

The Package Contents Include:

1. One (1) Mounting Base
2. One (1) Oil Filter Adapter
3. Four (4) Bolts

If your package contents differ, please contact Brock's Performance at 937-912-0054.

For additional installation support please refer to the OEM service manual.

Instructions:

1. Support the bike on a wheel stand or lift.
2. Drain oil from the engine and remove the oil filter.
3. Clean all mounting surfaces thoroughly.
4. Disassemble the oil filter relocator.
5. Check that the Mounting Base o-ring and Oil Filter Adapter o-ring are fully seated in the groove.
6. Apply a small amount of clean oil to the two (2) O-rings.
7. Install the Mounting Base with the mounting holes parallel to the ground.

Note: Do NOT tighten the mounting base over ¼ turn after the O-ring contacts the mounting surface.

8. Install the Oil Filter Adapter and secure with the four (4) supplied Bolts. Torque the bolts in a cross pattern to 50 lb-in (5.7 N·m).
9. Install oil filter and refill engine oil.

Note: Allow a minimum of 1/8" (3 mm) clearance between the oil filter and exhaust pipes.

10. Start engine and check for leaks.

Warning: Improper installation may result in oil leaks which may damage the engine or cause an accident. Always check for leaks after warming the engine. Brock's Performance will not be responsible or liable for any injury or damage caused by improper installation or use of this product for any other purpose.

ALL BROCK'S PERFORMANCE PRODUCTS ARE DESIGNED FOR CLOSED-COURSE RACETRACK USE ONLY!
