IMPORTANT – PLEASE READ:

PERFORMANCE FXR SWINGARM TRANSMISSION CASE INTERFERENCE

Attention Harley-Davidson® FXR owners: Before installation the Performance FXR Swingarm, check for potential transmission case interference issues (shown in black marker in the image below,) especially when using aftermarket transmission cases. Clearance cases as required.

FXR Transmission Case Interference Location

Attention:

When spacing FXR rear wheel, the overall width including spacers, brake hanger, etc. Must be: 10.250 in +.020in/-.000in / (260.35mm +.50mm/-.00mm)

Overall hub width is critical for proper operation/handling, product longevity, and rider safety. Brock's Performance will not warranty any damaged swingarm found not to be in compliance with these spacing guidelines.

WARNING: Chassis adjustments can alter the handling characteristics of any machine, and a lowered vehicle is more likely to experience obstacle and/or cornering clearance contact problems.

ALL BROCK'S PERFORMANCE PRODUCTS ARE DESIGNED FOR CLOSED-COURSE RACETRACK USE ONLY!
