PORSCHE GT3 RS

**THE WORLD'S LEADING MANUFACTURER  
OF CARBON FIBRE WHEELS**

NOW INTRODUCING THE  
**GT TEK WHEEL**  
PORSCHE GT3 RS | PORSCHE GT2 RS

*\*WINNER OF THE SEMA 2021 AWARD FOR BEST NEW WHEEL*

## **A WHEEL THAT CHANGES EVERYTHING**

BST brings you the lightest and most advanced wheels in the world – meeting and surpassing the highest international standards in performance, safety, endurance and visual appeal. BST has been the world leader in carbon fibre wheels for 20 years, and their automotive wheels have been on the road for more than five years.

In 2021, BST launched the new aftermarket GT TEK wheel – for the Porsche RS centre lock models. The world's first Ultra Lite wheel for supercars, the GT TEK clocks in at an astonishing 5.885kg (12.95lbs) on the front and 7.750kg (17.05 lbs) on the rear. An jawdropping achievement for a carbon fibre wheel that is road and track certified.

**THE GT TEK HAS SUBSTANTIAL  
PROVENANCE OF PRECISION  
QUALITY ENGINEERING**

BST is the longest standing Carbon Fibre manufacturer with more experience and wheels on the road than any other.

BST GT TEK wheels have been extensively road-and-track tested to the highest international standards, matching and exceeding BST's industry-leading performance, safety and strength metrics, while boasting BST's trademark sultry good looks.

## A REMARKABLE TRACK RECORD

For more than two decades, BST have supplied award-winning lightweight carbon fibre wheels to tens of thousands of motorsport champions, motoring enthusiasts and leading OEMs across the globe, designing and manufacturing wheels for some of the world's most prestigious car and motorcycle brands.

BST carbon fibre wheels grace the Delage D12 – voted the world's "most beautiful car" in 2020; the Ariel Atom – the world's fastest track car; the Donkervoort D8 GTO supercar; and the fun and beautiful Vuhl 05.

BST design and produce wheels for every make of superbike from Aprilia to Yamaha, as well as for some of the most prestigious manufacturers – Ducati, Arch Motorcycles, Norton Motorcycles and MV Agusta – equipping these exclusive bikes with a competitive advantage that is not achievable with any other wheel.

## REINVENTING PERFORMANCE

Uncompromising excellence. Unparalleled experience. Bespoke design and manufacturing. Trusted partner to the world's premier supercar and superbike brands. Just a few of the reasons that BST is acclaimed as the world's leading carbon wheel manufacturer.

### **GT TEK: A WORLD FIRST**

- ✓ The first and only 100% carbon fibre wheel (no metal parts)
- ✓ The lightest and strongest wheel on road or track
- ✓ The first and only completely hollow spoke carbon wheel
- ✓ The first and only carbon wheel manufactured with pre-preg carbon fibre, heat and pressure

**GT TEK won the SEMA 2021 award as the best new wheel product. Up to 50% lighter than OEM equivalents, the GT TEK is also the safest wheel on road or racetrack, complying with all JWL and DOTE safety standards. Combine that with reduced road noise, optimized stiffness, direct OEM-replacement and you've got yourself a winning wheel.**

# WHY CHOOSE **BST**

BST has led the carbon revolution for 20 years and boasts over 100 years of composite experience in their industry-leading technical team, with specialists in the fields of motorsport, aeronautical and F1 composite engineering, specialist composite design and pioneering R&D. BST uses advanced manufacturing and technology to produce their super-strong, lightweight masterpieces.

Quality does not come easy or by accident.

## **PERFORMANCE**

BST carbon wheels are up to 60% lighter than a regular alloy wheel – resulting in superior handling, braking, acceleration, fuel efficiency, noise reduction and outstanding road handling. The equivalent of a significant engine upgrade.

## **SAFETY**

Sharper response. Improved driver control. Wheels that hold the road. Wheels that are constantly subjected to the most rigorous and demanding testing to meet international safety standards.

## **STRENGTH**

Carbon fibre is 13 times stronger than aluminium, giving you extreme durability for all conditions, on racetrack or road.

## **TECHNOLOGY**

BST brings you to the most advanced carbon fibre wheel on the planet. Wheels created with the most advanced materials and technologies that are used by NASA and Formula 1. An automotive wheel so cleverly designed it outperforms any other.
