BLACKSTONE TEK

FOR THE FUN VEHICLE IN YOUR LIFE

LIGHT IS ALWAYS RIGHT

UTES & TRUCKS ARE PROBABLY THE MOST FUN VEHICLES OUT THERE!

But when it comes to making wheels for them, we take it as seriously as we take our performance supercars.

Your truck deserves the best, toughest and lightest wheels. BST provides them in magnificent hi-tech Carbon Fibre. Nothing beats the thrill of having the best toys EXCEPT when they really, really work for you as well.

LIGHT-WEIGHT WHEELS ON A TRUCK?

Yes! BST carbon fibre wheels deliver the best performance – the super-light weight makes it feel like you just gave your truck a complete makeover. You'll feel like you just boosted the power of your engine for faster acceleration, added bigger brakes for quicker braking, and upgraded the suspension for sharper road handling – it's all yours, courtesy of BST.

The weight you want to lose that makes the biggest difference to the performance of any vehicle, is the weight that hangs from the suspension – the unsprung weight or mass.

Light weight wheels are the holy grail of unsprung mass, and BST is the grand master of light weight carbon fibre wheels. BST uses the same materials and processes as Formula 1, the aeronautical and the aerospace industries - technology that allows us to engineer the properties of carbon fibre to deliver mind boggling performance.

BLACKSTONE TEK PROUDLY DELIVERS:

- The world's first and only carbon wheels for utility vehicle trucks
- The world's lightest and toughest carbon fiber wheels
- Aerospace qualified materials and processes as used in Formula 1 and by NASA

ANOTHER WORLD FIRST

TUFF TEK wheels now available for the **Ford F150**, the **Raptor** and the **Ranger** Range.

Thread Size:	M14 x 1.5	M14 x 1.5	Model Year: 2015-Current
Weight:	18.022 lbs / 8.175 kg	20.50 lbs / 9.3 kg	
Load Rating:	1900.38 lbs / 862 kg	1900.38 lbs / 862 kg	
WHEEL SIZE (IN):	18.0" x 9.00"	20.0" x 9.00"	APPLICATION:
Bolt Config:	6	6	Ford Everest Ford Ranger
PCD:	22mm adapter supplied for easy fitment of 18" and 20" wheels: Converts 139.7 mm to 135mm		
Offset:	Converts 42 mm to 20mm		
Centre Bore:	Converts 93.1mm to 87.10mm		
Thread Size:	Converts M12 x 1.5 to M14 x 1.5		Model Year: 2015-Current
Weight:	18.022 lbs / 8.175 kg	20.50 lbs / 9.3 kg	
Load Rating:	1900.38 lbs / 862 kg	1900.38 lbs / 862 kg	

TUFF TEK wheels are designed to meet the most rigorous test standards in the world:

JWL test standards for strength requirements

BST TUFF TEK wheel design gives optimal bending stiffness which governs deflection during cornering.

BST TUFF TEK wheels are DOT E compliant, and each one carries a unique serial number with full traceability.

BST wheels carry a 2 year factory warranty on workmanship. For more details on BST please visit www.blackstonetek.com
